Discussion and agreements:

- We finalized Deliverable 2, giving us a better structured idea of our goals and plans for this project. All members filled in sections 6.2 and 7, with each person giving their perspective on the app and why it is useful.
- We decided to make our first bot train the woodcutting skill, as it's a relatively easy skill to train in-game and test/debug.
- We will tentatively meet next Wednesday night.

Some goals we have for the upcoming weeks:

- Get a(n at least semi-working) prototype of this bot out in the next couple weeks.
- Start planning the finer details of how the bot will operate.
- Update Trello with all the deadlines.
