Group members: Tanner Massahos, Joseph Remy, Julian Bell, Tyler Boice, Chase Mosteller

Group name: Operation: D.I.N.G.O

Date: 02/10/2018

Meeting time/Place: 6:00 PM – 7:00 PM ; ACM Room

Facilitator: Tanner Massahos

Minute Taker: Joseph Remy

Discussion and agreements:

- How does everyone feel D. 1 Inception went?
    - It was pretty much a strong consensus around the group that we need to be getting these deliverables done about two days beforehand rather than waiting until the last day as it felt quite rushed.

- Does everyone know how to use GitHub through Bash command line or by using a GUI?
    - Most individuals in the 3/5 of the individuals in the group do know how to use GitHub through the command line or a GUI so we are going to figure that out ASAP.

- How did everyone's interviews go? Did you feel like the interviews helped you get a greater understanding of what we need to accomplish?
    - Everyone's interviews went well, and we all received re-assurance on our idea so that felt good and boosted team moral.

- We also discussed which types of bots we were going to make more in-depth and decided to start at the MVP and move up from there as we don't want to bite off more than we can chew.

- Some key take-aways from this meeting were:

    - Get deliverables done earlier
    - Continue asking people questions about our bot
    - Begin laying out the requirements
    - Enjoy the bots we are creating and it will make this overarching project fun
